**TUESDAY, OCTOBER 17TH  
7:30-8:30 PM PST**

## **AUDITORY BRAIN DEVELOPMENT: WHERE SPOKEN LANGUAGE LEARNING BEGINS**

Did you know, you hear with your brain? It's a common misconception that we hear sounds with our ears. Our ears are just the "doorway" to the brain. Hearing technology opens the doorway to the brain for children with hearing loss.

In this session, you will learn how to help your child to develop speech and language through listening, as auditory brain development is the foundation for spoken language.
